

ATTENTION RESTAURANT INDUSTRY:

TRANS FAT IS BAD!

**That's Why
Jason's Delis Are
Free Of Partially
Hydrogenated Oils**

**We did it.
Why can't you?**

The partial hydrogenation of oils creates harmful artificial trans fat. There is no partially hydrogenated oil in any of the food at our 156 restaurants. We strongly believe that partially hydrogenated oils should never be served to customers.

We have a responsibility.
